WHY YOUR LAYOUT FITS THE SHEET

- Depth: 29'-0" retail + 16'-10" band + 29'-0" rear = 74'-10", plus four walls ≈ the 76' building. That puts all the small rooms in one band between the sales floor and the HUB, which is what you described.
- Rear: 28'-3¼" × 29' = 820 SF (818.53 labeled) and 18'-9¼" × 29' = 544 SF (541.34). Together they span the 47' width.
- Break room: 9'-3" × 16'-10" = 156 SF vs 151.56, so it runs the full band depth on the east side of the hall.
- Office (131.82) sits across the back of the hall and restroom, about 13'-9" wide (the sheet's 13'-8¾").
- FOH + BOH take the rest of the band: 163.44 + 180.26 = 344 SF ≈ 20' wide × 16'-10".
